

**T2**

**RED**

**Home insurance  
doesn't cover  
termite damage.  
But we do.**

# Why T2 Red?

Building a new home is one of the most important financial commitments you and your family will ever make, so it makes sense to protect your investment against the threat of termite and borer infestation. There's no replacing the structure of your home, so it's important you get it right the first time. Put T2 Red to work for you, and we guarantee it will keep working for the next 25 years.

MORE OVERLEAF

## WHERE TO USE T2 RED

Suitable for all areas of mainland Australia; T2 Red provides protection against termites and wood borers including *mastotermes darwiniensis*, found north of the Tropic of Capricorn.

# The Facts: Termites & Borers

There are over 350 species of termites, white ants and borers in Australia

T2 Red is recognised as a leading termite resistant timber framing

The treatment is CodeMark® Australia certified for quality and conformity

Termites don't like the sun, and will tunnel up to 50 metres in search of food and shelter

Your home insurance policy won't cover damage caused by termites

Termites are estimated to cause more damage than fire and storms combined

Every piece of T2 Red is graded to meet the Australian performance standard.

**T2 Red protects your home from the inside out, so you don't need to worry about chemical sprays around your home.**

#### **FAMILY FRIENDLY**

Safe for you, your family, and your pets. Our treatment is registered with the APVMA and is not considered to be carcinogenic, mutagenic, reproductive, sensitising, or a hazard to humans and mammals alike.

#### **ORGANIC FORMULA**

Don't let the word 'organic' fool you. Our treatment is tough, and designed to mimic the termite resistant properties of some plant species found in nature. Its active ingredients (synthetic pyrethroids) are more commonly used in flea collars and human head lice shampoos.

#### **LOW MAINTENANCE**

Unlike other termite systems such as barriers, meshes and chemical sprays, T2 Red requires little to no attention thereafter. We simply recommend you adopt a common sense approach to maintaining your home and its surrounds. Set and forget.

#### **WALLET FRIENDLY**

Compared with other termite systems, T2 Red not only has a low setup cost but no ongoing costs. And with no annual inspections or maintenance required, T2 Red really is a hassle free solution.

■ Our treatment penetrates the timber fibres, providing long-term protection to your most valuable asset.

■ Unlike other treated framing brands, T2 Red does not require cut ends or planed surfaces to be resealed with termite treatment.

#### PEACE OF MIND

Low maintenance, and guaranteed for 25 years. Homeowners and renovators can rest easy knowing that the structural framing of their house is protected from termite damage – when built with T2 Red.

#### INDEPENDENTLY CERTIFIED

Don't just trust us. T2 Red has achieved independent CodeMark® Australia certification which means you can be sure of its quality, consistency and compliance with the Building Code of Australia (BCA).

#### ENVIRONMENTALLY FRIENDLY

Our Australian plantation pine is sustainable, with a lower net environmental impact than most other building materials. It offsets greenhouse gas emissions when used as a direct replacement for steel and concrete.

#### A PROVEN PERFORMER

For over 134 years Australian homes have been built with Hyne Timber framing. So we know a thing or two about protecting your investment in the long-term. Hyne Timber remains an iconic Australian, family owned business to this day.

# Protecting the North

Each year we produce enough  
T2 Red to span from Townsville  
to Broome via Darwin.

We stand by our product, in fact, we've never had a claim. Our 25 year guarantee is fully transferable, offering you, and future owners, the ultimate peace of mind.

# FAQ's

---

## Is T2 Red safe?

Yes. T2 Red is safe for all mammals, including humans.

---

## How long does the treatment last?

T2 Red is formulated to last for the normal economic life of a home.

---

## Where in the home can T2 Red be used?

Indoors, above ground only as either an alternative or to complement termite barrier systems.

---

## Where in Australia can it be used?

T2 Red is recommended and guaranteed for use north of the Tropic of Capricorn.

## How do I tell if it's T2 Red?

It's red and marked at regular intervals with the Hyne Timber brand.

---

## Can I cut it?

Yes. It can also be notched or drilled without any need for resealing.

---

## What should I do with the offcuts?

You should be able to dispose of offcuts through normal trade waste collection services. For large volumes check with your local waste service authority for disposal restrictions.

---

## Will T2 Red corrode metal fittings or fasteners?

No. Normal steel nails and plates are suitable for use as fixings.

## Is it environmentally friendly?

Yes. Our timber is sustainably sourced and greenhouse positive, plus our organic treatment is petrochemical free.

---

## Does it meet Australian Building Codes?

You bet. T2 Red is independently audited and has achieved CodeMark® Australia certification and therefore conforms to the ABCB Building Code of Australia.
