Frequently asked T3 Green Plus questions.

Page 1 of 1

Do it right. Ask for T3 Green Plus.

If you want your structure to stand the test of time, protect it with T3 Green Plus. It's not only treated to the core for resistance to the elements, termites and fungal attack, but is also a low odour and very low VOC product - making it people and planet friendly, and suitable for use both indoors and out.

-
- + **What is T3 Green Plus?**
An all new, unique, H3 treated structural timber framing product.
 - + **How is it unique?**
Unlike many other 'low odour' H3 treated products, T3 Green Plus has ultra low VOC emissions - making it safe for both indoor and outdoor projects.
 - + **What's in the treatment?**
Ingredients commonly used to protect food crops from pests as well as organic fungicides.
 - + **Is it as durable as other H3 products?**
T3 Green Plus features preservative retention targets that far exceed the relevant Australian Standards and timber industry conventions, so you can be absolutely assured of it's performance.
 - + **Do I install it differently?**
The installation requirements do vary between indoor and outdoor projects, but are no different to other treated timber products.
 - + **Is it environmentally friendly?**
Yes. T3 Green Plus is petrochemical-free, making it the safest and most environmentally friendly treated timber product available today.
 - + **Is the timber sustainably sourced?**
T3 Green is made exclusively from Australian grown plantation pine - sustainably sourced, greenhouse positive, 100% renewable and organic.
 - + **Why is the surface grooved?**
A reeded surface provides timber users with a number of benefits including improved safety while handling and fewer visible surface blemishes.
 - + **Is it guaranteed?**
T3 Green Plus is fully supported and guaranteed by Hyne Timber - for up to 25 years.
 - + **Is it BCA compliant?**
Hyne Timber prides itself on quality. T3 Green Plus is independently quality assured with CodeMark certification and therefore BCA compliant.
 - + **How do I tell if it's T3 Green Plus?**
It's light olive green and marked at regular intervals with the Hyne Timber brand.
 - + **Where can I get more information?**
